

INTERNATIONAL ROBOTICS HONOR SOCIETY

Recognizing dedication, focus and development through the IRHS

The REC Foundation recognizes the dedication many students demonstrate through their focus on academics, competitive robotics, character development, and community service. The International Robotics Honor Society launches specifically with them in mind, offers a unique opportunity to recognize individual students and celebrate their contributing to the community.

As a member of an International Robotics Honor Society Chapter, students gain access to a network of like-minded peers and mentors who can support their growth and development. Members have the opportunity to participate in exclusive events and workshops, enhancing their skills and knowledge in the field of robotics. Additionally, being part of the society can bolster college applications and resumes, showcasing a commitment to excellence and leadership in STEM-related areas.

Academics
Promoting Academic Excellence

Character
Advancing Character Development

Service
Encouraging Service Engagement

Community
Elevating Student Participation

How to Join the IRHS

We invite high schools in the United States and abroad to apply for chapter memberships. Once the school is accepted, Advisors can invite student applicants to their chapter.

Recognizing Students Excellence in Robotics

Use the School Chapter Application to [apply here](#). For more information please contact IRHS@recf.org.

Application Period

- High Schools can apply for chapter membership **July 1 through November 30**.
- Once the school is approved for chapter membership, students can apply to their school's chapter **through January 31**.
